Papercut card

Instructions No. 2404

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Sending or presenting a **card** is always something very personal. This card not only comes up trumps with a great **3D effect**, but also catches the eye with its **papercut elements**. Designing this card is not difficult at all. With our free template you can easily create this leaf card.

This is how the card is made:

Print out the **templates** and transfer them to the corresponding **papers**. We have chosen a combination of pink, purple and green here. However, you can choose and use the papers according to your taste.

Cut out the motifs with the **cutter** and trim the leaves so that they are not completely cut out. Leave the lower part of the leaves closed. Now you can fold the leaves up a little on the sides for a great **3D effect**.

The green paper was glued with double-sided adhesive tape, the other two papers with 3D adhesive pads. This creates an additional beautiful 3D effect.

Glue the **beads** with craft glue.

Must Have

Handicraft paper pad "Rainbow Colours"

Grammage: 180 g/m²
DIN format A4
Material: Paper

9,99 € (1 m2 = 5,34 €)
