Advent calendar with winter scene

Instructions No. 2331

Difficulty: Advanced

Working time: 6 Hours

An **Advent calendar** is not only fun for the person who makes it, but also for the adults or children who get to open a door every day. Our Advent calendar offers a great **Christmas scene** and is an eye-catcher.

This is how you design the Advent calendar:

The back panels and 8 drawer fronts were designed using the **napkin technique** and **glitter napkin varnish**. To do this, first cut the napkin as desired and remove the unprinted layers of the napkin. For the napkin technique, you

only need the printed layer. Coat the back wall or the drawer with the napkin varnish and place the napkin on the coated area. Coat the motifs again with varnish and leave to dry.

We painted eight more drawers with **craft paint** in beige and one drawer in gold for Christmas, 24 December.

Once dry, stick the **number stickers** on all the drawers.

The side panels and the top of the upper compartments were painted with **Stardust**. Two coats were applied for better coverage. If you like, you can dab some Stardust into the napkin motif for a nice effect.

Download the templates for the door and window and transfer them to **kraft paper**. Cut them out and add wood grain using a fineliner. You can also cut kraft paper for the bottoms of the compartments and use the fineliners to imitate wood grain.

Stick the door frame onto the door using **3D adhesive pads**, add a wooden hemisphere as a knob and stick on the miniature wreath as a door wreath. Then glue the door into the wintry scene. Fold the windowsill and roll a small "flower pot" from strips of kraft paper and glue it together. Cut a piece of the fir branch, stick it in and glue it to the windowsill. Glue the window into the scene with 3D pads.

Paint the **terracotta pot** gold with craft paint, glue a branch of the fir tree inside and place it next to the door.

We cut a small **doormat** from the felt and painted a heart on it with Stardust.

Place the lantern and fix it with some double-sided tape.

Glue together a **fence** from some thin strips of kraft paper and add details with the fineliners.

Wrap the **fairy lights** around some fir and attach to the cabinet with hot glue. The battery compartment and the remaining cable can be hidden behind the branch.

Now you can glue the **deer** into the scene and a great winter landscape with a beautiful Advent calendar is ready.

Must Have

VBS Folding cupboard / Advent calendar

Number of parts: 25
Length: 21.5 cm
Width: 9 cm
Height: 30 cm
Material: MDF wood
