Transform your living space with a butterfly wreath: the perfect crafting instructions

Punching out butterflies

Start by punching your butterflies out of Paper using a punching machine and the appropriate punching template . A die-cutting machine is a helpful tool that applies pressure to cut out precise shapes from Paper . The punching template is the template for the butterfly shape. Experiment with different colors and patterns to give your wreath a lively look.

Connect the butterfly halves

Now that you have a variety of butterflies, take two parts of each butterfly and glue them together in the middle. This gives the butterflies a 3D effect that makes them look particularly lively. Use liquid glue and make sure to fix the center evenly - this will give your butterflies a realistic body.

Attach the butterflies to the wreath

Grab your prepared wreath to use as a base. Use hot glue to attach the butterflies to the wreath. Be careful as the hot glue gets very hot! Place the butterflies in such a way that they are evenly distributed but still appear random to create a natural look.

Your wreath is ready, admire your work of art!

Now you have created your own individual butterfly wreath. Hang it on a door, a wall or use it as a table decoration to add a touch of spring to any setting.
