

Anleitung: Accessoires aus Korkstoff

Instructions No. 1244

In this guide we show you how to create great accessories from Cork fabric in just a few steps.

And that's how easy you design the case

Cut the fabric as shown on the template and punch the two open holes. Then take the Snaps pliers and attach the individual parts of the snap fasteners in the designated places. The fully marked points in the template correspond to the button tops and the curled marks correspond to the bottoms of the snaps

When closing the case, make sure that the flap with the underside of the button is first turned over, then the open holes are turned over and only then the side flaps are turned over to close the case. Accordingly, you should pay attention to this folding when attaching the buttons

And that's how easy it is to make the cable bundler

For the cable holder, simply cut out a Fabric cut according to the template. Then mark two directly opposite points about 1 cm from edge away and attach to these once the button bottom and once the push button top - done.

This idea is timelessly beautiful!
