

# Anleitung: Kreativ-Set Tannenbäume

Instructions No. 1374

The Christmas Christmas trees in Scandinavian design from design-Felt and yarn rolls are quickly made with the help of this instruction.

**And this is how it is done:**

4 Cut out Felt sheets round and stick it on the Rattan cane floor. Push the yarn rolls onto a round wooden stick and glue them together. Then glue the stick with the thread rolls in the middle of the Rattan cane floor. The base is ready.

Cut the design-Felt into approx. 65 small pieces according to the template. Now glue the triangles on the cone (VBS Handicraft glue ). Start at the bottom edge and try to work as evenly as possible. The next row is then placed between the triangles of the first row. You can choose the distance yourself. As a general rule, the deeper you place the triangles, the tighter the "dress" will be. Finally, the finished cone is glued to the base.

**Glue**

For this creative idea we recommend for gluing the triangles and Felt sheets on the rattan tube bottoms**VBS Handicraft glue**. The use of a hot glue gun is ideal for gluing the yarn roll.

**Decoration**

Decorate the finished Christmas trees according to your personal taste, for example with small stars, **half pearls** or **with a ribbon** .

**Article information:**

Article number	Article name	Qty
632836	Half pearls, mother of pearl	1
291446-80	Satin ribbon, 10 mmWhite	1
111065	VBS Handicraft glue	1
