

Bulb Hyacinth in Wax

Instructions No. 1737

Difficulty: Beginner

Working time: 30 Minutes

Hyacinths are the early messengers of spring. They **smell** wonderfully intensive and have beautiful **bright colours**. We show you how to dip the **tubers in wax** and create an eye-catcher in your home. This makes the hyacinths wonderfully easy to care for, as they no longer need to be watered.

Since you don't have to cast the hyacinths in wax, they are also great for hanging up or decorating in flower arrangements.
