

Casting shells from casting compound

Instructions No. 4061

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 3 Hours

With this simple **casting technique**, you can make decorative **shells from casting slip** - ideal as a decorative element or for further decoration.

Once dry, the finished shells can be painted, varnished or decorated in other ways.

Have fun casting and designing!

It's so easy to make the shells:

Material requirements:

VBS Silicone full mold "sea shell" large → approx. 8 heaped tablespoons of KeraHobby

VBS Silicone full mold "sea shell" small → approx. 4 heaped tablespoons of KeraHobby

Mix the casting compound

Pour the required amount of KeraHobby casting powder into a mixing cup and gradually add water. Stir the mixture thoroughly until it has an even, creamy consistency.

Fill the mold

Carefully pour the mixed casting compound into the silicone casting mold. Make sure that the mold is completely filled.

Avoid air bubbles

Tap the filled mold lightly on the work surface several times so that trapped air bubbles can escape. Do not lift the mold to avoid spilling.

Leave to harden

After about **3 hours**, you can carefully remove the castings from the silicone mould .

Drying and finishing

Allow the cast shells to dry completely. Any rough edges can be carefully smoothed with a fine sandpaper .
