coaster made from creative casting slip

Instructions No. 2972

Difficulty: Beginner

Working time: 2 Hours

Create your own coaster. in just a few steps This cast coaster is ideal for placing other decorations or everyday objects on and adding even more harmony and cheerfulness to the interior.

This is how it works:

First, place the **silicone stamps** in the **casting mold**. Then mix the creative casting compound with **water**. We recommend **approx. 5 heaped tablespoons** of VBS KreaHobby powder for one bowl. Make sure that the mixture has a creamy consistency and does not clump. If you want to give your creation a special color, add 2 drops of **colour concentrate** to it. In our example, we have opted for the VBS colour concentrate in the color green. Mix everything well and pour the mixture evenly into the mold.

Tap the mold gently on the table. This will cause air bubbles to rise.

After about **45 minutes**, you can carefully remove the casting from the mold. Leave the coaster to air dry for a while before carefully removing the stamps.

Must Have

VBS Casting powder "KeraHobby", White, 1 kg

Weight: 1 kg

5,99 € (1 kg = 5,99 €)
