

Colourful Easter garland

Instructions No. 480

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 15 Minutes

Happy garlands with colourful flowers and eggs are a great Easter decoration . Simply line up Satin ribbon the individual elements and decorate your home with them.

And here's how it works

Punch out flowers from the different papers and cut them out using the template Easter eggs . Stick two pairs of the motifs against each other on the Satin ribbon

For the fan-shaped flowers, fold **an approx.** 30 cm long and as wide a strip as you like into an accordion and glue the ends together. The result is a little hat, the middle of which you then press down to form a flat circle. Press it together from the outside to the inside and fix it in the middle with a drop of hot glue until there is no gap left and the circle remains flat. Alternatively, you can also use circles cut out with pinking scissors

Now put the different elements together and **decorate** everything with gemstones and liners. Use one button for the centre of each flower. Tie a loop in the end of the satin ribbon and hang your colourful spring garland on it.

Extra handicraft tip

The Paper-flowers and the Easter eggs also look very beautiful when they are **hung** separately in the Easter bouquet.
