Cosmetic tissue box in concrete look

Instructions No. 3077

Difficulty: Beginner

This stylish box with graphic elements in concrete look has a simple design. The semi-circles are bang on trend and create an exciting 3D effect. Embellish your cosmetics or tissue boxes now too!

Make a stencil from Paper . For these instructions, a circle with a diameter of 5 cm was used and then divided in the middle. Trace the outline of the semicircle with a pencil on the foam sheets and cut out all the semicircles as precisely as possible using scissors.

Glue one side of the semicircles flat with double-sided adhesive tape. Remove the protective layer from adhesive tape and place your shapes on the tissue box. Tip: Use a ruler and pencil to draw fine guide lines on the blank. This will ensure that you stick all the foam rubber parts on straight.

Now the edding permanent spray in concrete look comes into play. Before using it for the first time, remove the red safety ring and shake the spray for 3 minutes. You can then spray it evenly onto the element covered with foam sheets . Spray evenly in a criss-cross pattern and at a distance of approx. 25 cm from the object.

Allow the tissue box to dry sufficiently. Then fill the cosmetic box with wipes and enjoy your new decorative element in a trendy concrete look.
