Der Blumenstecker ist als Fensterdekoration ein echter Hingucker!

Instructions No. 560

Difficulty: Advanced

Working time: 15 Minutes

This idea is timelessly beautiful!

Some Article are unfortunately no longer available

And this is how it works

Bend a sufficiently long piece of wire Ø 2 mm according to the template to form a flower. Twist the ends of the wire together. Place a facet ball on a protruding wire and bend an eyelet at the top and bottom. The other end will be needed later as a rod holder.

Thread the facetted beads in the colour change on a wire Ø 1 mm and wrap them bit by bit around the flower shape. Saw the round rod to the desired length and prime Lemon Yellow it with Hobby Color - prime a rose pot as well.

After drying, wrap the remaining wire end tightly around the rod. Fill the rose pot with putty and fix the moss with straw flower needles. Tie organza Satin ribbon and another bow and fix it with hot glue on the flower stick. Finally, insert the flower stick into the rose pot.

But this idea is too good to withhold from you. We would be happy to continue to present it to you - let yourself be inspired!
