Easter basket with wickerwork

Instructions No. 2468

Difficulty: Beginner

Working time: 4 Hours

Are you still looking for a beautiful decoration for Easter? Then these self-woven Easter baskets are just the thing. You can easily weave the Easter baskets yourself and later place them on the table, for example. These baskets also reflect the trendy theme of nature.

First, start with the bamboo skewers by shortening them to the desired length. Then take the wooden balls and put them on the shortened bamboo skewers. Then glue the wooden balls to the bark discs with Ponal wood glue. Now you have to let this dry for a while.

Next, when everything has dried, you can start to wrap or weave the skewers with natural bast or VBS decorative willow. Then you can fill the nest with moss and an egg.

Finally, you can stick dried flowers and feathers into the wickerwork as you wish. Here you can give free rein to your creativity for the Easter basket.

Must Have

VBS Birch discs, 10 pieces

Content: 10 pieces
Material: Birch wood

4,99 €
