

Farbenfrohe Sommerkissen

Anleitung No. 1460

🖌️🖌️🖌️ Difficulty: Beginner

Painting cushions is very relaxing and fun - above all, it creates unique pieces of jewellery that add colour to any sitting area.

The finished creative sets contain a natural-coloured cotton cushion pre-printed with the contours, sufficient paint, a brush and even a small painting palette.

Paint with colours according to your personal taste!

With the help of the painting palette you will certainly succeed in mixing your individual favourite colour. You should consider further tips when painting cushion covers:

- Before applying the first coat of paint, place a protective sheet in the cushion cover. This will prevent paint from seeping through the fabric to the underlying layer.
- Start painting light coloured areas and later apply the dark colours. Light colours are easier to paint over, making them suitable for the first brushstrokes.
- When changing colours, make sure that your brush does not contain any residues of the old paint. This way you will always get a clean painting result.

As soon as your artwork is finished, the cushion cover is air dried. After washing at max. 40°C the pre-printed contours will have disappeared.
