Fimo Christmas Tree Pendant

Instructions No. 1547

This Christmas winning idea of our handicraft competition "Hauptsache selbstgemacht" by Rieke (our 3rd place) is especially suitable for Christmas handicrafts with children.

Fimo figures in a Christmas tree ball

Design Christmas baubles in a different way: from soft Fimo Modelling clay small figures are formed according to your personal taste, hardened in the oven and then decoratively glued into transparent Acrylic balls .

Modelling made easy

Knead the Modelling clay. The warmth of the hands makes the mixture wonderfully soft and smooth. First, form only into the Modelling clay of a colour. From small balls you can create heads and bodies, from "sausages" you form arms and legs.

Roll the Modelling clay to a flat "dough" and cut out shapes for your creative idea. Your idea did not succeed? Then simply knead the mass together and start a new attempt! For this reason, this kneading fun is also particularly suitable for the Crafting with children.

Your finished Santa Clauses, reindeer, Christmas trees & Co are then hardened in the oven. If you like, you can provide the figures with a Protective varnish

As soon as the figures are glued into the Acrylic balls or on cutting discs, they can be hung on the Christmas tree or on a Christmas branch - absolute eye-catchers!
