Fluffy door wreath with miniatures

Instructions No. 2573

Difficulty: Beginner

Working time: 1 hour

What an **extraordinary wreath**! In our instructions, we show you how you can easily make this wreath. The **fluffy effect** of the fur ribbon makes the wreath very special.

How to make the fluffy wreath:

Wrap the fur **ribbon** around the **polystyrene ring**. Fix the beginning and the end to the back of the ring with hot glue. Please make sure that the hot glue is not applied directly to the styrofoam, otherwise it could melt. It is best to apply the glue to the ribbon and then stick it to the Styrofoam ring.

Tie the artificial **plants** into a bouquet with a ribbon and attach it to or in the fur ribbon with a little hot glue.

Cut the **ribbons** as desired, tie them and glue them to the wreath.

Now attach the additional decorations. Paint the **snowflakes** as you like with **craft paint**. Glue on the flakes as well as the polar bear.

Finally, tie the ribbon for the hanging around the wreath and pin it in place. This prevents the ribbon from slipping.
