Lantern Whale

Instructions No. 1829

Difficulty: Beginner

Working time: 1 hour

SunMoon and a small whale.. In autumn the lantern season starts again and what is more beautiful than a great homemade lantern? With our free template you can conjure up this cute whale easily and with little effort. Children's eyes will shine with delight.

Here's how it's done:

First download the free **motif template**, print it out and transfer the whale silhouette twice with a pencil on the photo cardboard **"Mermaid" and the fontaine** on white . Of course you can also use other photo cardboards. Cut

everything out. Stick **rainbow straw silk** over the back or inside of the whale. It is best to use some **Handicraft glue**. Tip: Apply it Handicraft glue with a brush, as this makes it easier to spread

You paint the sleeping eye with a **Marker** on. Cut from salmon-coloured **Straw silk paper** Ovals, which are to represent the cheeks and glue them with some glue as well **Handicraft glue** on the face

Now print out the intermediate part, transfer it and Craft cardboard sheet cut out everything. Make sure that the intermediate part is about 50 cm long. Bend the prongs inwards and glue it Handicraft glue to the whale

Make a hole at the top of each side with a hole puncher or a hole punch. Stick the lantern bracket in there and bend the ends up. Now a light source is missing. You can use both an LED tea light **and** a LED light chain**.** Finally you need only the **Lantern rod** into the hanger.
