Marbled soap and molded soap soap dish

Instructions No. 3032

Difficulty: Beginner

Working time: 3 Hours

Marbled soap is a highlight in the bathroom at home and a great DIY gift. Making soap yourself is very easy and super relaxing. what's more, you have lots of wonderful gifts afterwards - perfect for Easter, birthdays or even Mother's Day.

This is how you pour the soap dish and the soap:

Time to dry: Pouring compound: approx. 45 minutes

Time to dry: Soap: approx. 1 hour

For the **soap dish** mix about 5 tablespoons of the **casting compound** with water to form a creamy mixture and pour it into the mold. Demold it according to the instructions above Time to dry: and leave it to **soap dish** dry a little in

the air. Then coat it with plaster sealant, preferably in 3 - 4 layers: the tray will then be waterproof.

Melt the **casting soap** and add approx. 1 - 2 drops of the **soap colour** and about 3 - 4 drops of the **soap scent** of your choice. By adding the color you already get a small optical **marbling effect**. If you want this look to be very pronounced, run a bamboo skewer through the soap mixture 1 - 2 times. Pour it into the mold and leave it to dry. Melt new eco casting soap for each soap: you will need approx. 1 - 1.5 tablespoons per soap.
