

Marbled soap and moulded soap dish

Instructions No. 3032

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 3 Hours

Marbled soap is a highlight in the bathroom at home and makes a great DIY gift. Moulding soap yourself is very easy and super relaxing. What's more, you'll have lots of wonderful gifts afterwards - perfect for Easter, birthdays or even Mother's Day.

This is how you pour the soap dish and the soap:

Casting compound Drying time: approx. 45 minutes

Soap Drying time: approx. 1 hour

For the **soap dish**, mix about 5 tbsp of the **casting compound** with water to make a creamy mixture and pour it into the casting mould. Demould it after the drying time specified above and leave the soap dish to air dry for a while. Then coat it with plaster sealant, preferably in 3 - 4 coats: the tray will then be waterproof.

Melt the **pouring soap** and add approx. 1 - 2 drops of the **soap colour** and approx. 3 - 4 drops of the **soap scent** of your choice. Adding the colour already gives you a small optical **marbling effect**. If you want this

look to be very pronounced, run a bamboo skewer through the soap mixture 1 - 2 times. Pour it into the casting moulds and leave to dry. Melt new eco mould soap for each soap: you will need approx. 1 - 1.5 tablespoons per soap.
