Maritime Lichtboxen

Instructions No. 1603

Difficulty: Advanced

Working time: 1 hour

Create **a highlight in** your home with these **maritime light boxes**. Lightboxes are **easy to make yourself and** to design individually. A **wonderful light source in** your own four walls.

Preparation of the cardboard frame

First**prime** a round **cardboard frame** with white Acrylic paint and let it dry. Each light box is decorated with **Décopatch** Paper Cut this to size and stick it on the frame. Use a brush and Décopatch lacquer.

Now place the frame on your **Lamp foil** and mark the outer circle with a pencil. Cut the Lamp foil to size.

Tip: Our **star foil Magic Star** conjures up extraordinary light effects. Illuminated with a chain of lights, many shining

stars come to light.

Light box "Ahoy"

The light box "Ahoy" gets its special look from the flotsam and the shell optic

The Lamp foil is equipped with **stamping ink**, a **brush** and **Stencil** decorated with Sea shell- or beach motif The best way is to spray Stencil in advance with **temporary spray glue**so it can't slip. Then place the Stencil on your foil and use a brush to dab the design on.

You **can** print out our **lettering "Ahoy"** or you can choose a lettering according to your wishes. Put your message under the foil and paint it with a **Marker** after. In our example, we have added **further**accents **to the** font as nights with a **white Marker** .

In the next step you can open the slide **with Handicraft glue** onto the frame. The adhesive seam and thus the edge of the self-made light box is then glued with decrosive **Driftwood** ornamented

Driftwood and also the **chain of lights** on the back of the light box we have fixed to the frame at some points with hot glue.

Light box "compass rose

The Lamp foil of the light box "wind rose" is not painted with the usual Hobby Colour but with stamp ink. Use a **Ink Pads in the colour "Petrol" and dab** the entire cut Lamp foil with a sponge-stabbing brush.

The compass rose of this light box is painted on with a stencil. After the stamping ink has dried, spray the stencil with **temporary spray glue** to prevent it from slipping. The Stencil is placed centrally on the foil and dabbed with **stamping ink** . We have designed our compass rose in Stone Grey . As soon as the ink has dried, the **Craft foil** with **Handicraft glue** can be glued to the frame.

For the light box edge now a **Cotton cord** triple and knot a sailor's knot into it, e.g. a square knot. Glue the Cord with **hot glue to** the edge of the cardboard frame and decorate it according to your personal taste also with shells, **Driftwood** and **scattering.**

Finally, **fix** a **micro LED light chain** inside the frame with the **hot glue gun**.

Your atmospheric lighting is ready! Enjoy your new light source and the admiration of your guests.

Must Have

VBS Star foil "Magic Star"

Length: 50 cm
Width: 50 cm
Thickness: 0.2 mm
Material: Plastic

4,29 € (1 m2 = 17,16 €)
