# Outdoor Mosaic Plate

**Instructions No. 2442**

Difficulty: Beginner

Working time: 6 Hours

Mosaic crafting - a technique that is always trendy! When making mosaics, you glue glass stones of different sizes and colours close together on a desired surface, such as a plate in our example. This gradually creates an impressive pattern or even a pictorial representation.

## Crafting with mosaic:

1. First prime the "Topeca" plate with Chalky Outdoor Color. Once the colour has dried, spray everything with clear varnish. Let the varnish dry completely.

2. Now you can start laying the mosaic: spread some glass mosaic glue on the plate and place the mosaic pieces on top.

Use the mosaic tongs to break up the mosaic pieces. Important: be sure to put on your safety goggles to avoid injuries!

Allow everything to dry thoroughly .

3. Mix the grout according to the package instructions and spread it over the entire mosaic surface with a brush.

Excess grout can be removed with a damp sponge.

4. As soon as the grout is completely dry, you can coat the mosaic with grout finish. The mosaic joint finish seals the finished mosaic and protects the surface from dust and dirt.

## Must Have

### Broken glass mosaic, 2 kg, thickness approx. 3 mm

Weight: 2 kg
Size: 8 - 20 mm
Thickness: 3 mm
Material: Glass

**17,95 €** (1 kg = 8,98 €)
~~RRP 26,16 €~~
