Plant tray with snails and plugs

Instructions No. 2960

Difficulty: Beginner

Working time: 3 Hours

Plongez dans le monde de la créativité en fabriquant une petite oasis de verdure chez vous avec une jardinière en bois, des piques à plantes et des escargots déco ! Donnez à ces éléments en bois les couleurs qui vous plairont, apportez-leur quelques petites touches particulières et obtenez une décoration unique pour votre balcon ou votre intérieur ! Lancez-vous dans ce DIY, l'amusement n'attend pas !

1. Color the wooden elements:

First paint the wooden plant bowl, the snails VBS Snails, the VBS Wood-plugs and some scatter decoration with wood stain. Let the paint dry completely before continuing.

2. Fine sanding for a smooth surface:

After the wood stain has dried, the protruding wood fibers can be lightly sanded with fine sandpaper . This will give your project a smooth and professional finish.

3. Artistic lettering:

Next, print out the lettering and transfer it to the prepared wooden planter using graphite paper. You can then trace the lettering exactly using the Posca marker . There are no limits to your creativity - draw further outlines and patterns to refine the design.

4. Set decorative accents:

Wrap the terracotta pot and the plant bowl with the decorative ribbons . You can then fix the scatter decoration in place with a little handicraft glue to add further decorative elements.

5. Protection for outdoors:

If you want to place your artistic creations outdoors, we strongly recommend that you also apply a protective varnish . This not only protects only from the weather, but also intensifies the colors and extends the life of your artwork.

With these steps you can create your individual wooden bucket with VBS-Snails - a unique and personal decoration for your garden or living space. Have fun crafting!
