Pouring lanterns houses

Instructions No. 3487

Difficulty: Beginner

Lanterns conjure up a unique atmosphere in any home. **Homemade lanterns in the shape of small houses** are particularly charming. Wondering how to cast these decorative works of art yourself? With our detailed step-by-step instructions and a little creativity, you can do it with ease. These individual lanterns are perfect for spreading warm light and coziness during the darker months of the year.

Casting lanterns in the shape of a house: creative instructions for atmospheric decoration

Step 1: Mix the casting compound

Start by mixing about four tablespoons of casting powder with water. Make sure you achieve a creamy, lump-free mixture. The consistency of the mixture determines how detailed your lanterns will ultimately be. It is important to work without lumps, as lumps can lead to unevenness.

Step 2: Fill and shape the casting mold

Now pour the creamy casting compound into the prepared "houses" silicone casting mold. You have creative freedom as to how you position the inner part of the mold. If you put the opening at the bottom, your casting will have a base. If you point the opening upwards, you will create a cylindrical object. Play with shapes here and find out what you like best!

Step 3: Shape and leave to dry

Now leave your mold to dry for around four hours. Patience is required here, as complete drying is essential for an optimal result. After Time to dry: you can carefully remove your cast houses from the silicone molds.

Step 4: Finishing the details

If there are any residues in the windows or other details, simply remove them with a bamboo skewer. This will ensure that the details of your houses are clean and precise. To give the edges of the houses a smooth and professional look, you can carefully finish the edges with sandpaper .

Step 5: Finishing for a special shine

If you want to give your houses a special shine, the use of VBS acrylic metallic is the perfect choice. This special acrylic paint provides a great finish.

Step 6: Bringing the light into the dark

Now you can make your little works of art shine: Place chains of lights or tea lights in the cast houses. The finished wind light-houses now radiate a warm and inviting light that will enchant any room.

Let your creativity run wild!
