Pouring soap for Christmas

Instructions No. 1536

Difficulty: Beginner

Working time: 20 Minutes

Are you looking for a particularly personal gift idea for Christmas? Small lovingly self-made soaps are an ideal gift or souvenir for the Christmas season.

Enjoy your creative time in the personal Christmas soap workshop

The basis for your own soaps is the **VBS cast soap.** This consists of purely vegetable raw materials (contains glycerine) and contains no other additives, and is therefore suitable for allergy sufferers. The soap can be heated in the microwave directly in the small packaging bucket according to the product instructions.

You can mix this basic mass according to your personal taste with **Soap colour** or **scented oil or** with added soap care substances.

If possible, do not use only a **mould for your** soap workshop at the same time and place relief inlays in it for a nice surface look. Depending on the colour and fragrance used and the relief inlay, very unique soaps are created.

That certain extra: self-cast Soap dish in concrete

Treat yourself to another creative project and cast a concrete bowl to match the soaps. Here the **casting mould „Soap dish "grooved"** is greased with some household oil **beforehand**. Mix the **concrete casting compound**

according to the product instructions and fill into the mould. After the Soap dish has dried through, finally coat the surface of the shell with protective **Napkin varnish**

Pour it immediately: Concrete gift tag
Fascinating concrete pendants for your Christmas soap gift bags are also quickly made by yourself. **Instructions 1535** explains exactly how easy it is to create Gift wrappings .

Must Have
