Self-made Easter eggs with filling

Instructions No. 1573

Difficulty: Advanced

Working time: 1 hour

Large Polystyrene eggs can be transformed into huge surprise eggs. Learn here how easy it is.

This is how the Polystyrene eggs are painted:

With the Strich-Ex pen, motifs can be easily sketched out, the lines of the pen disappear after some time. With pastel Handicraft paint the eggs can be primed according to your personal taste.

Dots, serrations and petals as on the decoration examples can be painted very well with brush pencils (Brushpen). These pens are of course also suitable for labelling.

Afterwards only still with fine Silk paper line and close.

The fast alternative

Untrained draughtsmen and painters can alternatively paint Polystyrene Egg or more robust cardboard eggs with paint and then decorate them with Lace ribbon All self-made Easter eggs with filling will surely be well received!
