Soap Block with Layers & Blossoms

Instructions No. 2196

Difficulty: Challenging

Working time: 1 hour 30 Minutes

Our soap is a great sight in the bathroom. The colour gradient and the scattered flowers are eye-catchers. Even as a gift, the recipient will be delighted with the **wonderfully fragrant homemade soap**. It smells wonderful, is good for your skin and looks beautiful!

This is how the beautiful soap block is made:

For this idea, divide the **soap** into 5x approx. 250 g. There are several ways to do this: You can take the soap out of the dish with a spoon and weigh it or melt it in the container beforehand (according to the instructions on the banderole).

Place approx. 250 g in the universal **melting pot** and bring it to melting point. Drop 2-3 drops of **soap colour** into the melted soap at a time. How much **fragrance oil** you drip into the soap per colour is up to you, as some fragrances smell more intense than others. In general, you can say that the fruity scents smell more intense than the floral ones. Also add a little (1-2 drops per 250 g) **soap foam** concentrate.

Pour the first layer into the **silicone mould**. Immediately afterwards, melt the next 250 g of soap. During this time of

melting, a film forms over the poured soap. As soon as you put the next layer into the mould, the layers mix in the middle due to the heat. The edge remains mostly layered. Repeat the process as often as you like.

Leave the finished soap to dry in the mould for about 5 hours. Then remove the silicone mould from the wooden dish and roll down the sides.

Now decorate the soap with **flowers**. To do this, gradually liquefy the top layer slightly with a lighter and sprinkle the blossoms on top.

You can now cut off the finished soap layer by layer. Experience the **great colouring** of the soap.

These slices make an **excellent gift** for your loved ones. Simply place them decoratively in a bag and decorate with a little ribbon, flowers or sprinkles.
