Trendiger Türkranz in Rot-Weiß

Instructions No. 1022

This trendy **door wreath in red and white shades captivates** with its modern elements in Nordic **style**
Buttons, Jingles and the fir branch are artistically staged and the willow wreath gets its winterly shine through the decorative snow. Combine the Embellishment and ribbons effectively into this wreath and hang it on your door as an eye-catcher during the Christmas season.

And it's that easy:

Wipe the wreath with the decorative snow winter white and let it dry. Thread the knitted ribbon through the wreath on one side and fix it with hot glue. Fix the other end on the opposite side
Tie about 3 fir branches together with wire and fix it over the end of the knitted ribbon on the right side of the wreath.

Decorate the wreath with buttons, sprinkles and Christmas apples. Use polyband and natural bast to hang the wreath. Make a soap from the excess of the ribbons by integrating Jingles . You can also integrate the ribbons into

the wreath by tying small loops and applying them in combination with the strewing parts.

Complete the wintery touch by adding some accents to the wreath decoration with the decorative snow. Before you hang up the wreath, the decorative snow should have dried.
