Weihnachtskranz mit Wollbällchen

Instructions No. 1730

Difficulty: Beginner

Working time: 1 hour

Herewith we present the winning idea (1st place) of our Christmas craft competition 2018 "Hauptsache selbstgemacht!

Our winner "Lu" has **made** a very special **Christmas wreath**.
The basis for this door wreath is a flat **Polystyrene ring**. Now wrap differently coloured **wool** around differently sized **Polystyrene ballsTip:** Spread some of the Polystyrene ball **Handicraft glue** and wrap it around the ball. Thus the first layer is Polystyrene ball attached to the Wrap until the bauble is completely covered with wool and fasten the rest of the wool again with Handicraft glue. The finished wool baubles are attached to the wreath with some **hot glue**.
You can also fix the **wooden parts** and the **lettering** with hot glue. In the run-up you can also fix the wooden parts to match the rest of your decoration with **Handicraft paint** colored design. Finally, an **LED light chain** can be attached inside the wreath for a beautiful lighting effect.

Optionally the wool balls can **be sprayed** with some spray glue and then decorated with some glitter.

Here you can discover the two other winning ideas:

- Christmas mice with sleigh
- Snowy winter village

Must Have

Polystyrene ring flat (Roman), Ø 30 cm

Diameter (outside): 30 cm
Material: Polystyrene

2,59 €
