

# Wiederverwendbare Abdecktücher

Instructions No. 1778

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 20 Minutes

Now that the weather is better, the barbecue season has finally started again. This means that the most delicious delicacies are coming from the kitchen to the table. But to protect the food outside from insects, bowls, cups and dishes are often covered with cling film. But to save all that plastic waste afterwards, we have a simple and **sustainable solution** for you: reusable **cover cloths!**

It does not get any easier than this:

Draw a **circle** on any **fabric**. This circle should be slightly larger than the bowl to be covered. Then cut **out** the circle with a pair of pinking scissors

Now cover your work surface and place the cut-out fabric circle on top. Apply the **Tex Wax** to both sides with a **brush** or **sponge**. The whole thing must then **harden** for about 2 **hours**.

After **Tex Wax** has been applied and treated with heat (hairdryer or iron), it is absorbed into the fibres of the fabric and transforms the material into a reusable, **breathable film**. This can be shaped by the heat of the hands. In this way, countless covers can be produced for the most diverse cups, bowls and dishes. **Tip:** The whole thing also works for glasses, of course. Just cut out the fabric as usual, if necessary cut a hole in the middle for a straw and then coat it with wax. So insects have no chance to land in your drink!

Do you want even more **sustainability**? Meanwhile there are bowls, cups and also Coffee-to-go cups made Bamboo. of these are unbreakable and at the same time simply sustainable. In addition, the cups and co. can be decorated with the most diverse colours such as **porcelain** and glass, **MarkereverythinMarkerg** or with the **Napkin technique** design

**Note:** The Bamboo-bowls and cups are even dishwasher safe!

## Must Have

### TexWax Impregnating Fluid

● **9,95 €** (1 l = 39,80 €)  
~~RRP 26,77 €~~
