Winter decorations with frost effect colors

Instructions No. 966

This arrangement accompanies you through the entire winter season. With small, frosty elements and the decorative snow, a simple glass plate and four tea light glasses are transformed into a harmonious decoration. Illuminated with tea lights it shines in a warm light and makes the cold season appear a little brighter at the same time.

And it's as simple as this:

Punch a snowflake from Coloured paper and spray the snowflake with spray adhesive on one side over a protective base. Then place the snowflake on a glass. On another one you place the snowflake cutout, which you also fix with spray glue. Now apply the frost paint around the flake, and on the other glass, only the flake. Pull off the stencils carefully with tweezers. Decorate the other two glasses and the plate like this. When everything is dry, bake the paint in the oven at 160°C for 30 minutes. Let the glassware cool down. Pick up silver paint with a sponge and wipe it roughly over the frost varnish. Let everything dry before you apply the decorative snow with the sponge. Finally, accentuate with the Glitterliner, on or around the flakes and around the edges. Decorate your plate with the glasses and some winter accessories.

Must Have

VBS Glass plate, round

Diameter (outside): 25 cm
Material: Glass

4,79 €
